## RESEARCH INTERESTS

**Statistical methods for analyzing microbiome data; Statistical genetics.** My research focuses on the development of statistical methods and software programs for analyzing high-throughput microbiome data and genetic data in human epidemiological and clinical studies.

## EDUCATION

**Ph.D., Biostatistics**, May 2011

Department of Biostatistics, University of North Carolina at Chapel Hill, Chapel Hill, NC

- *Dissertation*: Statistical Analysis of Haplotypes, Untyped SNPs, and CNVs in Genome-Wide Association Studies. (*Advisor*: Dr. Danyu Lin, Dennis Gillings Distinguished Professor)  
[\*\* Barry H. Margolin Doctoral Dissertation Award, Biostatistics, UNC-CH \*\*]

**B.S., Statistics**, Honor Graduate, July 2005

School of Mathematics, Peking University, Beijing, China

**B.S., Economics**, July 2005

China Center for Economic Research, Peking University, Beijing, China

## PROFESSIONAL EXPERIENCE

**Associate Professor** (tenured), September 2017 – present

Department of Biostatistics and Bioinformatics, Rollins School of Public Health, Emory University, Atlanta, GA, USA

**Rollins Assistant Professor** (tenure-track, endowed position), August 2011 – September 2017

Department of Biostatistics and Bioinformatics, Rollins School of Public Health, Emory University, Atlanta, GA, USA

## ADMINISTRATIVE LEADERSHIP ROLES

**Associate Director**, April 2021 – Present

Emory Center for AIDS Research (CFAR) Biostatistics and Bioinformatics Core

## PUBLICATIONS

**Methodological papers** [† **PhD trainee**] [\***corresponding author**]

1. Li, Y.<sup>†</sup>, **Hu, Y. J.\***, and Satten, G. A. (2022) MERIT: controlling Monte-Carlo error rate in large-scale Monte-Carlo hypothesis testing. *bioRxiv*, doi.org/10.1101/2022.01.15.476485. Software developed: R package MERIT
2. Li, Q., Vehik, K., Mothi, S. S., **Hu, Y. J.**, Krischer, J. P. (2022) A joint nested random effects model for metagenomic trajectory analysis with disease outcome in matched sets. *bioRxiv*, doi.org/10.1101/2022.04.19.488854. Under revision for *BMC Genomics*.

*Winship Cancer Institute Cancer Center Support Grant*  
Role: Co-I

### Emory funding

URC/ACTSI (PI: Hu) Emory University 05/01/15-04/30/16  
*Integrative Analysis of Multiple Data Sources to Improve Statistical Power in Detecting Rare Variants Associated with Complex Traits*  
Role: PI

WHSC Synergy Award Project 00072213 (MPI: Larsen/Hu) Emory University 11/01/17-10/31/18  
*Metagenomic Cartography of the Virome in Transplant Recipients*  
Role: Co-PI

WHSC Synergy Award (PI: Fedirko) Emory University 11/01/17-10/31/18  
*Cancer Immunotherapy, Gut Microbiome, and Kidney Cancer Outcomes*  
Role: Co-I

URC/ACTSI (PI: Kang) Emory University 05/01/12-04/30/13  
*Analysis of Ultra High Dimensional Data in Imaging Genetics Studies*  
Role: Co-I

### TEACHING

#### Department of Biostatistics and Bioinformatics, Emory University

- BIOS 709 Generalized Linear Models, Spring 2017, 2018, 2019, 2020, 2021, 2022.
- BIOS 508 Introduction to Categorical Data Analysis, Fall 2013, 2014, 2015, 2016.
- BIOS 516 Introduction to Large-Scale Biomedical Data Analysis, Fall 2013, 2015, 2017, 2019, 2021.
- BIOS 770 Advanced Statistics Genetics, Spring 2013, 2015, 2019.
- BIOS 570 Methods in Statistics Genetics, Spring 2013, 2015, 2017.
- BIOS 731 Advanced Statistical Computing, Fall 2012.

### ADVISING AT EMORY

#### Postdoc

- Henry R. Johnston (2012 – 2014, co-advising with Dr. Zhaohui Qin). Current position: Emory Integrated Computational Core Director.

#### Thesis advisees – Ph.D.

- Mengyu, He (2022 – present). *Statistical Methods for Analyzing Microbiome Data.*
- Yue, Ye (2020 – present). *Statistical Methods for Analyzing Microbiome Data.*
- Hu, Yingtian (2018 – present). *Statistical Methods for Compositional Analysis of Microbiome Data.*
- Zhu, Zhengyi (2017 – present). *Statistical Methods for Analyzing Clustered Microbiome Data.*
- Li, Yunxiao (2015 – 2019). *Statistical Methods for High-Dimensional Data.*

- Liao, Peizhou (2013 – 2017). *Statistical Methods for Next Generation Sequencing Studies*.  
– Livingston Award for a PhD student with excellent research potential, 2015.

#### Thesis advisees – Master

- Xu, Jiahui (2016 – 2017). *Assessment of Different Pipelines for Processing Microbiome Data*
- Sun, Zhe (2013 – 2014). *Estimating Genetic Effects When Stratification-Score Matching Is Used to Correct for Confounding by Population Stratification in Case-Control Studies*.

#### Ph.D. Dissertation Committee

- Lee, Haerim (2019 – present; Chair: Deborah Bruner in School of Nursing). *Vaginal microbiome in gynecologic cancer patients*.
- Huang, Yunfeng (2018 – 2020; Chair: Yan V. Sun, Department of Epidemiology). *Gene-lifestyle Interactions in Coronary Artery Disease*.
- Daniel, Gaea Anita (2017 – 2019; Chair: Deborah Bruner in School of Nursing). *Vaginal microbiome and intravaginal practices*.
- Alhanti, Brooke (2014 – 2016; Chair: Howard Chang). *Methods for Estimating the Effect of Air Pollution on Asthma under a Changing Climate*.
- Yuan, Shuai (2012 – 2014; Chair: Zhaohui Qin). *Applying Diploid Method to Improve Read-mapping and Analysis Based on NGS Data*. Current position: Microsoft, Seattle, WA.
- Jiang, Yunxuan (2011 – 2015; Chair: Michael P. Epstein). *Statistical Methods for Rare-Variant Sequencing Studies in Pedigrees*.

#### PROFESSIONAL ACTIVITIES

##### Editorial Service

- Associate Editor for *Statistics in Biosciences* (Jan 2022 - present)
- Associate Editor for *BMC Bioinformatics* (June 2022 - present)
- Guest Editor for Special Issue on “Statistical Analysis of Microbiome Data: From Methods to Application” in *Genes* (ISSN 2073-4425; IF 4.096) (Dec 2021 - present)

##### Journal Referee

- *Journal of American Statistical Association, Annals of Applied Statistics, Biometrics, Biostatistics, Genome Research, PLoS Genetics, Bioinformatics, Frontiers in Microbiology, Frontiers in Genetics, Microbiome, Environmental Microbiology, Genetic Epidemiology, Statistics in Biosciences, Statistica Sinica, Statistics in Medicine, PLoS One, Human Genetics, Genomics, BMC Genetics, Genetic Analysis Workshop, Statistical Applications in Genetics and Molecular Biology, Journal of Applied Statistics, Briefings in Bioinformatics, Bioinformatics Advances, NAR Genomics and Bioinformatics*

##### Panel Referee

- National Institutes of Health, the Infectious Diseases, Reproductive Health, Asthma and Pulmonary Conditions (IRAP) Study Section (Jul 2022)
- National Institutes of Health, the Population Sciences and Epidemiology (PSE) Review Branch, Special Emphasis Panel (SEP) (Dec 2021)
- National Institutes of Health, the Biostatistical Methods and Research Design (BMRD) Study Section (June 2020, March 2021)
- Dean’s Pilot and Innovation Grants, Rollins School of Public Health, Emory University (Feb 2020)
- Special Emphasis Panel on Million Veteran Program (MVP), VA (July 2017)

- National Institutes of Health, National Cancer Institute, EDNR: Biomarker Developmental Laboratories (U01) (Jun 2015)
- Health and Medical Research Fund (HMRF), Hong Kong (2015, 2016, 2018)
- Department of Defense (DoD), Joint Warfighter Medical Research Program (JWMRP)–Clinical and Rehabilitative Medicine (CRM) (Jun 2014)
- Specialized Research Fund for the Doctoral Program of Higher Education (SRFDP) and Research Grants Council Earmarked Research Grants (RGC ERG) Joint Research Scheme, Hong Kong (Jul 2012)

### Event Organizer

- ENAR Invited Session: *Frontiers in Analysis of Microbiome Data, from Concepts, Methods to Application*. (March 2023). Speakers: Drs. Glen Satten, Wodan Ling, Shyamal Peddada, Shulei Wang.
- JSM Invited Session: *Frontiers in Analysis of Microbiome Data, from Methods to Applications*. (August 2022). Speakers: Drs. Huilin Li, Alexander Alekseyenko, Gen Li, Anna Plantinga
- ENAR Invited Session: *New Topics in Analysis of Microbiome Data*. (March 2022). Speakers: Drs. Hongzhe Lee, Michael Wu, Cheng Lin, Ni Zhao.
- ENAR Invited Session: *New Topics in Analysis of Microbiome Data*. (March 2021). Speakers: Drs. Huilin Li, Ni Zhao, Zhigang Li, Jichun Xie.
- Southern Regional Council on Statistics (SRCOS), Kentucky (June 2019). Program co-chair.
- Banff International Research Station (BIRS) 5-day workshop: *Emerging Statistical Challenges and Methods for Analysis of Human Microbiome Data*. (9/15/19–9/20/19). Organizers: Yi-Juan Hu, Hong Gu, Shyamal Peddada, Michael Wu. Participants: 21.
- JSM Invited Session: *Quantification, association testing, and integration of microbiome*. Washington DC (August 2017). Speakers: Drs. Michael C. Wu, Jun Chen, Benjamin Callahan, and Huilin Li.
- ENAR Invited Session: *Integrative Analysis of Multi-Omic Data for Understanding Complex Human Diseases*. Austin (March 2016). Speakers: Drs. Kathryn Roeder, Hongyu Zhao, Nicolas Larson, and Karen Conneely.
- JSM Invited Session: *Statistical Innovations for Genetic Association Studies*. Seattle (Aug 2015). Speakers: Drs. Danyu Lin, Xihong Lin, Nilanjan Chatterjee, and Andrew Allen.
- ENAR Invited Session: *Frontiers in Statistical Genetics for Complex Trait Association*. Baltimore (March 2014). Speakers: Drs. Nilanjan Chatterjee, Michael P. Epstein, Jung-Ying Tzeng, and Glen A. Satten.

### Other Services

- Provide Tenure and promotional letter for three faculty members at other institutes.
- Invited reviewer for American Statistical Association (ASA) Distinguished Student Paper Competition, Section on Statistics in Genomics and Genetics, 2020, 2021

### SERVICE

### Department of Biostatistics and Bioinformatics, Emory University

- Tenure and Tenure-Track Monthly Meetings (Coordinator): 2020 – Present
- Faculty Search Committee (Co-Chair): 2019
- Biostatistics High Performance Computing Committee: 2018 – Present
- Methods Curriculum Ad Hoc Committee (Chair): 2017 – 2020
- Research Computing Working Group (Chair): 2017 – 2018
- PhD Qualifying Exams Committee: 2015 – 2018, 2022

- Faculty Search Committee: 2015, 2020
- Donna J. Brogan Lecture Committee: 2015
- Student Recruitment Committee: 2014
- Departmental Website Committee: 2013 – 2014
- Seminar Chair: Fall 2012
- PhD Admissions Committee: 2011 – Present

### **Rollins School of Public Health, Emory University**

- RSPH Computation and Data Science Advisory Committee (CDAG) (Co-chair): 2018 – Present
- Shepard Award Committee: 2015 – 2016
- Education Committee: 2013 – 2015

### **Professional Community**

- ENAR Regional Advisory Board (RAB): 01/01/2016 – 12/31/2018

### **HONORS**

- Grizzle Distinguished Alumni Award, Department of Biostatistics, University of North Carolina, Chapel Hill, NC, 2021.
- CDC ATSDR 2017 Statistical Science Award: Best Theoretical Paper, “Testing rare-variant association without calling genotypes allows for systematic differences in sequencing between cases and controls” by Hu, Y. J., Liao, P., Johnston, H. R., Allen, A. S., and Satten, G. A. *PLoS Genetics*, 12(5): e1006040. doi:10.1371/journal.pgen.1006040 (2016).
- Finalist for James V. Neel Young Investigator Award, International Genetic Epidemiology Society, 2015
- Teaching Award Nominee, Department of Biostatistics and Bioinformatics, Emory, 2013, 2017, 2018, 2019
- Barry H. Margolin Doctoral Dissertation Award, Department of Biostatistics, University of North Carolina, Chapel Hill, NC, 2012
- Delta Omega Induction (awarded for outstanding academic achievement for students graduating in the previous year), 2011
- Distinguished Student Paper Award, Eastern North American Region (ENAR), International Biometric Society, 2010
- Award for Best Performance in Ph.D. Qualifying Exams, Department of Biostatistics, UNC-CH, 2006
- FRYER Fellowship, Department of Biostatistics, UNC-CH, 2005
- Honor Graduate, Peking University, 2005
- Outstanding Student Award, Peking University, 2001 – 2005
- Guang Hua Scholarship, Peking University, 2003
- May Fourth Scholarship, Peking University, 2002
- Third Prize, China Mathematics Olympiad (Winter Camp), P.R.China, 2001
- First Prize, National High-school Mathematics Competitions, P.R.China, 2000

**Invited Departmental/Institutional Seminar**

1. Department of Data Science, Dana-Farber Cancer Institute, MA (Sep 2022). *Causal mediation analysis of microbiome data.*
2. Sydney Precision Bioinformatics Alliance, University of Sydney, Australia (Sep 2022). *It's all relative: testing differential abundance in compositional microbiome data.*
3. Department of Biostatistics, Peking University, Beijing, China (Jun 2022). *Causal mediation analysis of microbiome data.*
4. Department of Probability and Statistics, Peking University, Beijing, China (Apr 2022). *It's all relative: testing differential abundance in compositional microbiome data.*
5. Department of Biostatistics, University of Florida, Gainesville, FL (Feb 2022). *It's all relative: testing differential abundance in compositional microbiome data.*
6. Tongji School of Public Health, Huazhong University of Science and Technology, Wuhan, China (Sep 2021). *It's all relative: testing differential abundance in compositional microbiome data.*
7. College of Informatics, Huazhong Agricultural University, Wuhan, China (Sep 2021). *It's all relative: testing differential abundance in compositional microbiome data.*
8. School of Statistics, Renmin University of China, Beijing, China (Oct 2021). *It's all relative: testing differential abundance in compositional microbiome data.*
9. School of Data Science, The Chinese University of Hong Kong, Shenzhen, China (July 2021). *It's all relative: testing differential abundance in compositional microbiome data.*
10. Department of Preventive Medicine - Biostatistics, Feinberg School of Medicine, Northwestern University, IL (Oct 2020). *Testing Presence-Absence Associations in the Microbiome.*
11. Department of Biostatistics, Virginia Commonwealth University, VA (Feb 2019). *Analyzing matched sets of microbiome data using the LDM and PERMANOVA.*
12. Division of Biostatistics, Department of Population Health, School of Medicine, New York University, NY (Mar 2018). *Testing Hypotheses about the Microbiome using an Ordination-Based Linear Decomposition Model.*
13. Institute of Bioinformatics, University of Georgia, Athens, GA (Sep 2017). *Testing Rare-Variant Association without Calling Genotypes Allows for Systematic Differences in Sequencing between Cases and Controls.*
14. Department of Biostatistics, Duke University, Durham, NC (Feb 2017). *Testing Rare-Variant Association without Calling Genotypes Allows for Systematic Differences in Sequencing between Cases and Controls.*
15. The 4th Workshop on Biostatistics and Bioinformatics, Georgia State University, Atlanta, GA (May 2015). *Integrative Analysis of Sequencing and Genotype Array Data for Rare Variant Associations.*
16. Biostatistics and Computational Biology Branch, National Institute of Environmental Health Sciences, Research Triangle Park, NC (May 2015). *Integrative Analysis of Sequencing and Genotype Array Data for Rare Variant Associations.*
17. Department of Genetics, Rutgers University, New Brunswick, NJ (March 2015). *Integrative Analysis of Sequencing and Genotype Array Data for Rare Variant Associations.*
18. Center for Integrative Proteomics Research, Rutgers University, New Brunswick, NJ (Feb 2015). *Integrative Analysis of Sequencing and Genotype Array Data for Rare Variant Associations.*
19. Department of Statistics and Biostatistics, Rutgers University, New Brunswick, NJ (Feb 2015). *Integrative Analysis of Sequencing and Genotype Array Data for Rare Variant Associations.*

20. Department of Statistics, Purdue University, West Lafayette, IN (Feb 2015). *Integrative Analysis of Sequencing and Genotype Array Data for Rare Variant Associations.*
21. Department of Statistics, George Mason University, Fairfax, VA (Oct 2014). *Integrative Analysis of Sequencing and Genotype Array Data for Rare Variant Associations.*
22. Department of Statistics, University of Georgia, Athens, GA (Apr 2014). *Integrative Analysis of Sequencing and Genotype Array Data for Rare Variant Associations.*
23. Department of Statistics, Georgia State University, Atlanta, GA (Sep 2013). *Meta-Analysis of Gene-Level Associations for Rare Variants Based on Single-Variant Statistics.*
24. Fudan University, Shanghai, China (Jul 2013). *Integrative Analysis of Sequencing and GWAS Data in Detecting Rare Variants Associated With Complex Diseases.*
25. School of Life Sciences and Technology, Tongji University, Shanghai, China (Jul 2013). *Meta-Analysis of Gene-Level Associations for Rare Variants Based on Single-Variant Statistics.*
26. Department of Mathematical Science, Middle Tennessee State University, Murfreesboro, TN (Apr 2013). *Meta-Analysis of Rare Variants in Genetic Association Studies.*
27. Cancer Genetics and Epigenetics Seminar, Winship Cancer Institute, Atlanta, GA (Jun 2012). *Integrative Analysis of Sequencing and GWAS Data Improves Statistical Power in Detecting Rare Variants Associated With Complex Diseases.*
28. Department of Biostatistics, Vanderbilt University, Nashville, TN (Mar 2011). *A Likelihood-Based Framework for Association Analysis of Allele-Specific Copy Numbers.*
29. Department of Statistics and Actuarial Science, University of Waterloo, Waterloo, Ontario, Canada (Mar 2011). *A Likelihood-Based Framework for Association Analysis of Allele-Specific Copy Numbers.*
30. Department of Biostatistics and Bioinformatics, Emory University, Atlanta, GA (Feb 2011). *A Likelihood-Based Framework for Association Analysis of Allele-Specific Copy Numbers.*
31. Department of Biostatistics, University of Buffalo, Buffalo, NY (Feb 2011). *A Likelihood-Based Framework for Association Analysis of Allele-Specific Copy Numbers.*
32. Department of Biostatistics, University of Michigan, Ann Arbor, MI (Jan 2011). *A Likelihood-Based Framework for Association Analysis of Allele-Specific Copy Numbers.*
33. Statistical Genetics Seminar Series, University of North Carolina at Chapel Hill, NC (Oct 2009). *A Robust Statistical Method for Association Testing with Copy Number Variation.*

### Conference/Workshop Talks

1. ENAR, virtual (Mar 2022). *A New Approach to Testing Mediation of the Microbiome at Both the Community and Individual Taxon Levels.* **{Invited}**
2. JSM, virtual (Aug 2021). *Rarefaction-based extensions of the LDM and PERMANOVA for testing presence-absence associations in the microbiome.* **{Topic Contributed}**
3. ENAR, virtual (Mar 2021). *Testing Presence-Absence Associations in the Microbiome.* **{Invited}**
4. 13th International Conference of the ERCIM WG on Computational and Methodological Statistics (CMStatistics), Virtual Conference (Dec 2020). *Testing Presence-Absence Associations in the Microbiome.* **{Invited}**
5. ENAR, Vanderbilt, TN (Mar 2020). *A logistic regression for testing differential abundance in compositional microbiome data.* **{Invited}**
6. Banff International Research Station (BIRS) 5-day workshop, (9/15/19–9/20/19). *Analyzing Matched Sets of Microbiome Data using LDM.* **{Contact organizer}**
7. JSM, Denver, CO (Jul 2019). *Analyzing Matched Sets of Microbiome Data using LDM.* **{Invited}**

8. WJAR, Portland, OR (June 2019). *Analyzing Matched Sets of Microbiome Data using LDM*. **{Invited}**
9. ENAR, Pennsylvania, PA (Mar 2019). *Analyzing Matched Sets of Microbiome Data using LDM*. **{Invited}**
10. 11th International Conference of the ERCIM WG on Computational and Methodological Statistics (CMStatistics), Pisa, Italy (Dec 2018). *Analyzing Matched Sets of Microbiome Data*. **{Invited}**
11. American Society of Human Genetics (ASHG), San Diego, CA (Oct 2018). *Testing Hypotheses about the Microbiome using an Ordination-Based Linear Decomposition Model*.
12. Mathematical Statistics (IMS) Asia Pacific Rim Meeting (IMS-APRM2018), Singapore (June 2018). *Testing Presence-Absence Association in the Microbiome using the Linear Decomposition Model (LDM)*. **{Invited}**
13. Southern Regional Council on Statistics (SRCOS), Virginia Beach, VA (June 2018). *Testing Hypotheses about the Microbiome using an Ordination-Based Linear Decomposition Model*. **{Invited}**
14. International Indian Statistical Association (IISA), Gainesville, FL (May 2018). *Testing Presence-Absence Association in the Microbiome using the Linear Decomposition Model (LDM)*. **{Invited}**
15. American Society of Human Genetics (ASHG), Orlando, FL (Oct 2017). *Robust inference of population structure from next-generation sequencing data with systematic differences in sequencing*.
16. JSM, Baltimore, MA (Aug 2017). *Robust inference of population structure from next-generation sequencing data with systematic differences in sequencing* **{Invited}**
17. American Society of Human Genetics (ASHG), Vancouver, BC Canada (Oct 2016). *Testing rare-variant association without calling genotypes allows for systematic differences in sequencing between cases and controls*. **{Invited platform presentation}**
18. American Society of Human Genetics (ASHG), Baltimore, MD (Oct 2015). *Proper Use of Allele-Specific Expression Improves Statistical Power for Cis-eQTL Mapping with RNA-seq Data*. **{Invited platform presentation}**
19. International Genetics Epidemiology Society (IGES), Baltimore, MD (Oct 2015). *Integrative Analysis of Sequencing and Genotype Array Data for Rare Variant Associations*. **{Invited as one of the three finalists for James V. Neel Young Investigator Award}**
20. ICSA, Fort Collins, CO (Jun 2015). *Proper Use of Allele-Specific Expression Improves Statistical Power for Cis-eQTL Mapping with RNA-seq Data*. **{Invited}**
21. American Society of Human Genetics (ASHG), San Diego, CA (Oct 2014). *Integrative Analysis of Sequencing and Genotype Array Data for Rare Variant Associations*.
22. ENAR, Baltimore, MD (Mar 2014). *Meta-Analysis of Gene-Level Associations for Rare Variants Based on Single-Variant Statistics*. **{Invited Poster}**
23. ASHG, Boston, MA (Oct 2013). *Meta-Analysis of Gene-Level Associations for Rare Variants Based on Single-Variant Statistics*.
24. International Genetics Epidemiology Society (IGES), Chicago, IL (Sep 2013). *Meta-Analysis of Gene-Level Associations for Rare Variants Based on Single-Variant Statistics*. **{Invited}**
25. The Second Taihu International Statistics Forum, Wuxi, Jiangsu, China (Jul 2013). *Meta-Analysis of Gene-Level Associations for Rare Variants Based on Single-Variant Statistics*. **{Invited}**
26. IMS-China, Chengdu, China (Jul 2013). *Integrative Analysis of Sequencing & GWAS Data in Detecting Rare Variants Associated With Complex Diseases*. **{Invited}**
27. ENAR, Orlando, FL (Mar 2013). *Analysis of Ultra High-Dimensional Data in Imaging Genetics Studies*.

28. ASHG, San Francisco, CA (Nov 2012). *Integrative Analysis of Sequencing and GWAS Data Improves Statistical Power in Detecting Rare Variants Associated With Complex Diseases.*
29. Genetic Analysis Workshop (GAW), Stevenson, WA (Oct 2012). *Genetic Association of Common and Rare SNPs with Longitudinal Measurements of Blood Pressure.*
30. JSM, San Diego, CA (Aug 2012). *Accounting for Missing Data in eQTL Mapping.* {Invited}
31. ENAR, Washington DC (Apr 2012). *Association Analysis of Rare Variants with Selective Sequencing.*
32. International Congress of Human Genetics (ICHG), Montreal, Canada (Oct 2011). *A Likelihood-Based Framework for Association Analysis of Allele-Specific Copy Numbers.*
33. ICSA, New York, NY (Jun 2011). *A Likelihood-Based Framework for Association Analysis of Allele-Specific Copy Numbers.*
34. ENAR, Miami, FL (Mar 2011). *A Likelihood-Based Framework for Association Analysis of Allele-Specific Copy Numbers.*
35. ASHG, Washington, DC (Nov 2010). *Comprehensive Assessment of Methods for Untyped SNP Analysis.*
36. JSM, Vancouver, BC Canada (Aug 2010). *Analysis of Untyped SNPs: Maximum Likelihood and Imputation Methods.*
37. ENAR, New Orleans, LA (Mar 2010). *A General Framework for Studying Genetic Effects and Gene-Environment Interactions with Missing Data.*
38. ASHG, Honolulu, HI (Oct 2009). *Analysis of Genetic Effects and Gene-Environment Interactions under A Flexible Model for Gene-Environment Dependence.*
39. ENAR, St. Antonio, TX (Mar 2009). *Accounting for Gene-Environment Dependence in Genetic Association Studies.*
40. IGES, St. Louis, MO (Sep 2008). *Likelihood-Based Inference on Haplotype Effects and Haplotype-Environment Interactions.*

## SOFTWARE

### **LDM** (Linear Decomposition Models)

- An R package that provides a single analysis path that includes distance-based ordination, global tests of any effect of the microbiome, and tests of the effects of individual OTUs (i.e., operational taxonomic units) with false discovery rate (FDR)-based correction for multiple testing.  
<http://github.com/yijuanhu/LDM>

### **LOCOM** (LOGistic COMpositional analysis)

- An R package for testing differential abundance in compositional microbiome data with false discovery rate control.  
<https://github.com/yijuanhu/LOCOM>

### **MERIT** (controlling Monte-carlo Error Rate In large-scale monte-carlo hypothesis Testing)

- An R package for large-scale Monte-Carlo hypothesis testing that controls the Monte-Carlo error rate.  
<https://github.com/yijuanhu/MERIT>

### **BOUTH** (Bottom-up Tree Hypothesis Tests)

- An R package for testing hypotheses that have a branching tree dependence structure in a bottom-up manner, with false discovery rate control.  
<https://github.com/yli1992/BOUTH>

### **TASER-PC** (Test of Association using SEquencing Reads)

- A C++ program for robust inference of population structure from next-generation sequencing data with systematic differences in sequencing.  
<http://web1.sph.emory.edu/users/yhu30/software.html>

**TASER** (Test of Association using SEquencing Reads)

- A C++ program for testing association using sequencing reads without calling genotypes.  
<http://web1.sph.emory.edu/users/yhu30/software.html>

**PhredEM**

- A C++ program for phred-score-informed genotype calling.  
<http://web1.sph.emory.edu/users/yhu30/software.html>

**TRECASE\_MLE**

- A C++ program for *cis*-eQTL mapping with RNA-seq data.  
<http://web1.sph.emory.edu/users/yhu30/software.html>

**SEQGWAS** (integrative analysis of SEquencing and GWAS data)

- A C++ program for integrative analysis of sequencing and GWAS array data.  
<http://web1.sph.emory.edu/users/yhu30/software.html>

**MAGA** (Meta-Analysis of Gene-level Associations)

- A C++ program for meta-analysis of gene-level associations based on single-variant statistics of rare variants from participating studies.  
<http://web1.sph.emory.edu/users/yhu30/software.html>

**CNVstat**

- A C++ program for the genome-wide statistical association analysis of CNVs and Allele-Specific Copy Numbers  
<http://www.bios.unc.edu/~lin/software/CNVstat/>

**SNPMStat**

- A C++ program for the genome-wide statistical analysis of SNP-disease association with potentially missing genotype data, including untyped SNPs.  
<http://www.bios.unc.edu/~lin/software/SNPMStat/>

**tagIMPUTE** (tag-based IMPUTE)

- A C++ program for the genome-wide imputation of unobserved genotypes in SNP-disease association studies.  
<http://www.bios.unc.edu/~lin/software/tagIMPUTE/>

COMPUTATIONAL SKILLS

- Programming Languages: proficient in C, C++, knowledge of PERL and PYTHON
- Software: proficient in R, SAS
- Operating Systems: Unix and Windows

PROFESSIONAL MEMBERSHIPS

- American Statistical Association (2010 – Present)
- Eastern North American Region, International Biometric Society (2007 – Present)
- American Society of Human Genetics (2008 – Present)
- International Genetic Epidemiology Society (2008 – Present)
- International Chinese Statistical Association (2011 – Present)
- International Indian Statistical Association (2011 – Present)
