Adoption of Family-Driven Substance Use Services in the Juvenile Justice System: A Pre-Implementation Assessment

Study Purpose: The purpose of this study was to conduct interviews with juvenile justice staff and justice-involved families in Georgia to understand their perceptions of family-driven substance use services, as well as understand barriers and facilitators to implementation in the juvenile justice setting. Findings from this study will guide the development and implementation of evidence-based services in juvenile justice facilities.

Role: Principal Investigator (PI)

NIH/NIDA R25DA037190 subaward	Piper, Modrowski, Sheerin (MPIs)	\$ 21,384	2023-2024

Linkages Between Caregiver Traumatic Stress, Mental Health, and Substance Use, and Behavioral Health Services Utilization for Youth in the Juvenile Justice System

Study Purpose: The purpose of this study is to conduct interviews and surveys with parents/guardians of justice-involved youth to (1) understand caregiver perspectives regarding family-based services for youths in the juvenile justice system and (2) evaluate the role that caregiver mental health, substance use, and experiences of trauma play in the receipt of mental health services.

Role: Multiple Principal Investigator (MPI)

NIH/NIDA R25DA037190 subaward	Piper (PI)	\$9,936	2021-2023

Factors Related to the Adoption of Family-Driven HIV/STI and Substance Use Services in the Juvenile Justice System

Study Purpose: The purpose of this study was to conduct surveys with juvenile justice staff in Georgia to understand implementation-focused determinants of family-driven HIV/STI and substance use services in the juvenile justice system. Findings from this study will guide the development and implementation of evidence-based services in juvenile justice facilities.

Role: Principal Investigator (PI)

Implementing Trauma-Informed Care within HIV Services

The proposed study will increase capacity to conduct implementation science and address trauma service delivery within an HIV primary care setting in a high HIV prevalence area, Atlanta, GA.

Role: Graduate Research Assistant

NIH/NIDA U01DA036233 DiClemente, Sales (Site MPIs) 2013-2019

Reducing HIV and Substance Use in Detained Youth using Implementation Science

Study purpose: JJ-TRIALS (*Juvenile Justice Translational Research on Interventions for Adolescents in the Legal System*) is a multi-state/multi-site implementation science research project, which seeks to improve health outcomes for adolescents in the legal system. The project facilitated linkages to substance use treatment and HIV care among youth in need within the juvenile justice system.

Role: Graduate Research Assistant

NIH/AHRQ R24HS022059 Wingood/ DiClemente (PIs) 2013-2019

Disseminating an HIV Intervention for African American Women in Faith Institutions

Study purpose: The goal of this study was to assess institutional adoption of an evidence-based HIV prevention intervention, TEACH (*Training and Empowering African American Churches on HIV/AIDS*), among 24 historically Black churches in Atlanta.

Role: Graduate Research Assistant

Pediatric Research Alliance Grant Raval (PI) 2016-2019

Implementation of Enhanced Recovery after Surgery (ERAS) Protocol in Children's Hospitals

Study purpose: The goal of the study was to assess readiness and willingness to integrate an ERAS protocol (which is standard of care for adults) into pediatric surgery. We conducted a Delphi process to evaluate the appropriateness of an Enhanced Recovery after Surgery (ERAS) protocol for pediatric colorectal surgery patients.

Role: Research Scholar

Pediatric Research Alliance Grant Raval (PI) 2016-2019

Development and Evaluation of an Intervention to Reduce Pediatric Opioid Prescribing

Study purpose: The purpose of this study was to develop, implement, and evaluate an opioid prescription reduction intervention for pediatric surgeons at 9 hospitals.

Role: Research Scholar

NIH/MIDAS U54 Grefenstette, Kumar (PIs) 2014- 2016

Using Agent-Based Simulations to Understand Disparities in Influenza Transmission

Study purpose: The Models of Infectious Disease Agent Study (MIDAS) is a collaboration of research and informatics groups to develop computational models of the interactions between infectious agents and their hosts, disease spread, prediction systems and response strategies.

Role: Research Fellow

Pennsylvania Bituminous Mine Subsidence and Land Conservation Act Tonsor (PI) 2013-2014

Understanding the Impacts of Underground Mining on Stream Health

Study purpose: Pennsylvania Act 54 (Pennsylvania Bituminous Mine Subsidence and Land Conservation Act) was enacted to study the impacts of underground coal mining (which is a large industry in southwestern PA) on the environment.

Role: Research Fellow
